

United States Joint Forces Command

Joint Interoperability & Integration Technical Support

- Program / Project Management
- C4ISR Expert Services
- Policy and Programmatic Support
- Information Engineering
- Infrastructure Lifecycle Support
- Intelligence / Information Operations and Protection

PROJECT OVERVIEW

The United States Joint Forces Command (USJFCOM) has requirements for a wide range of Program Management and Information Technology Services. This includes production of doctrinal literature, assisting with budget and financial planning, and supporting logistic functions.

PSI SERVICES

PSI provides expertise in all areas of C4ISR (Command, Control, Communications, and Computers, Intelligence, Surveillance and Reconnaissance) in joint operations concepts, experimentation initiatives, and operational systems architectures. We handle the preparation of intelligence reports and provide recommendations regarding program integration and strategic planning. In addition, we provide expert policy, technical, and programmatic integration support critical to the protection of counterintelligence, information operations, and infrastructure systems.

PSI offers advice and support for information engineering, application development, network and communications design, hardware, and software selection. We also provide lifecycle support of information management programs, process analysis for information related activities, and voice, data, and video communications infrastructure support.
